

Tile Display

A multi-functional smart panel with a brilliant colorful design

Available for

buspro **KNX**

The new interface design enhances your experience.

The colorful interface makes Tile display more dynamic, and the bold color scheme makes it easier for children and the elderly to use.

One series of panels for more functionality

Tile display allows you to combine other panels in the Tile Series in one frame to maintain uniformity of interior style and and meet the need for automation in homes, offices, hotels and other environments.

Home

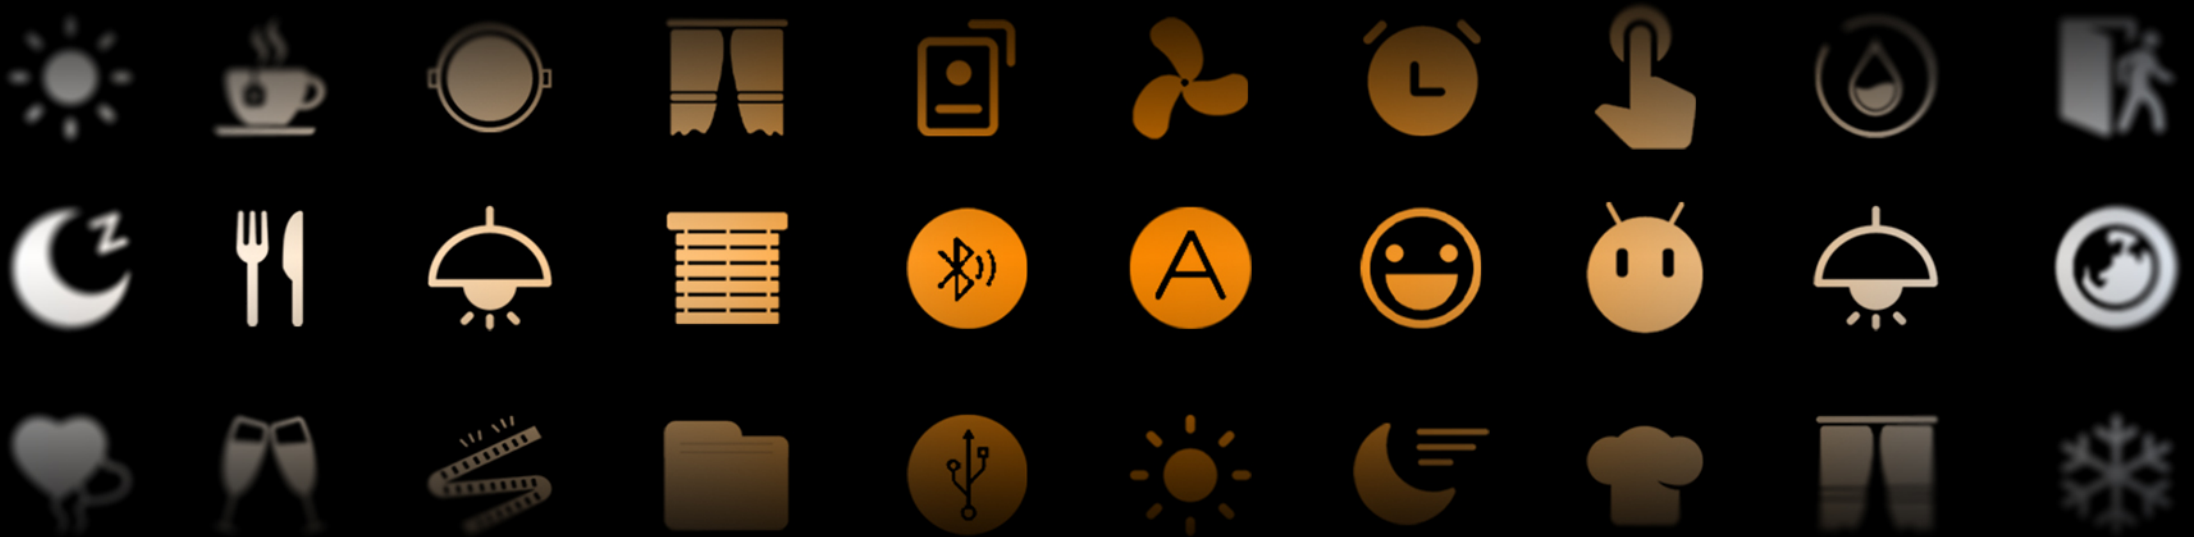

Office

Hotel

One-display control helps keep the wall tidy.

The 3.5-inch Tile Display controls the lights, curtains, music, air conditioning, ventilation and floor heating system. So, it keeps the wall neat and avoids the inconvenience caused by missing remotes.

Scene

One touch to turn off all the lights, right from the comfort of your bed.

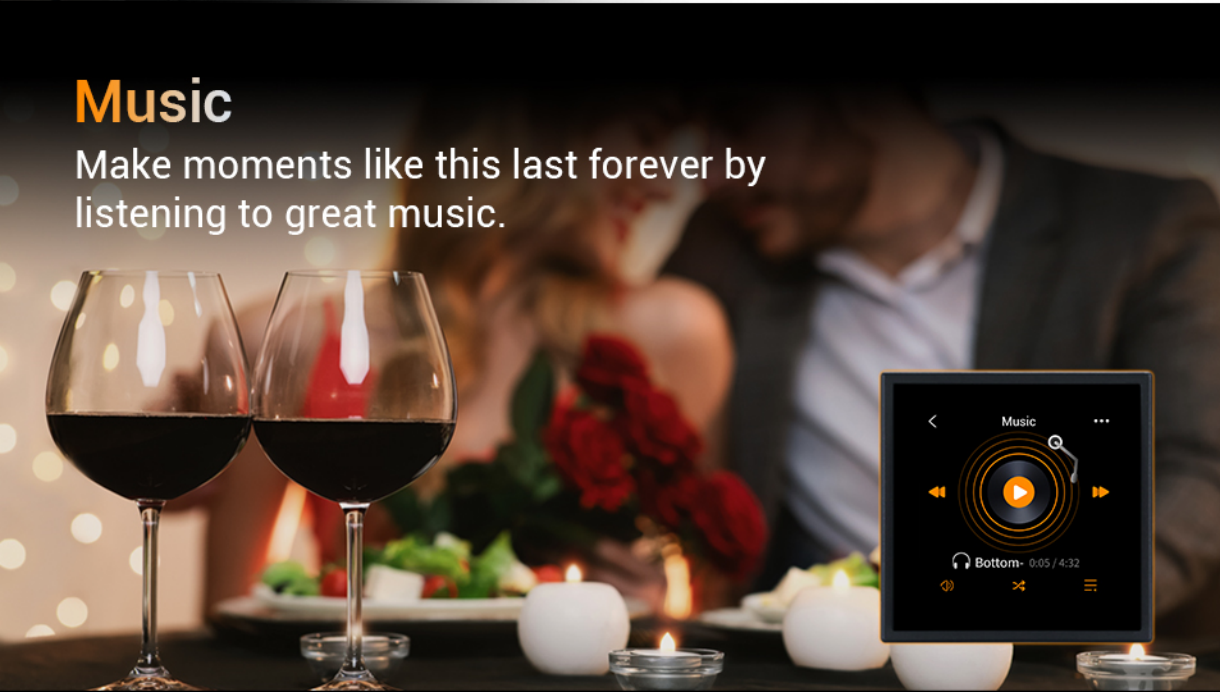

Curtains

Accurately control the curtains at your will.

Music

Make moments like this last forever by listening to great music.

Air conditioning

Keep a comfortable temperature for good sleep.

Control anytime and anywhere, as long as you want to

At home

One tap to turn off all the equipment in your house before going out.

Remote control

Activate the air conditioner while on your way home in the scorching heat of summer. You'll cool down as soon as you enter your home.

More convenient and efficient

Tile Display will be awakened when you approach. You can add frequently-used features or scenes to the home page and control them with one touch.
